

VERTICAL WORLD

ABSEIL CLEANING & MAINTENANCE SERVICES

Specialists in working at height

Rope Access is a method of achieving a safe work position whilst working at height or in areas with difficult access. Vertical World has a team of experienced technicians that will carry out your Industrial and building maintenance projects with a safe, and cost efficient method.

Benefits of Rope Access

- No inconveniences related to road closures or public hazards.
- Minimal disruption at ground level.
- Rapid installation and dismantling of equipment and materials saving on inconvenience cost to the client.
- More cost effective than other access methods-eg, cherry pickers, cradles, and scaffolding.
- Flexibility on rescheduling due to unpredictable weather.
- One of the safest occupations within the construction and cleaning industries.

As one of the leading rope access companies in Ireland, we have worked on some of the largest contracts in the country such as the land mark Harland and Wolff Cranes, Victoria Square in Belfast. and Short Bombardier Aerospace Hangers. We have been involved in major cleaning contracts in Belfast and Dublin over the past nine years but we also undertake smaller contracts like media, banner and sign installations.

We work in close conjunction with a number of companies such as Bradbury Graphics to meet our clients advertising and maintenance requirements in a cost effective and stylish manner. We can install banners to any specification, essentially wrapping your building. The rapid set-up time of Roped Access allows the Vertical World team to establish or depart from the site quickly and easily, leaving no visible signs of disturbance and no potential means of access for unauthorised persons.

DID YOU KNOW
WE CAN WRAP
YOUR BUILDING?

Quay Gate House, Belfast. Mesh Banner.

bradburyGRAPHICS

Cleaning is fast becoming one of the major uses of rope access. We are also able to clean and maintain areas inaccessible by traditional methods. By using a series of rigging procedures it is possible to clean and maintain almost any area of a building, inside or out.

We have worked for major industrial companies such as 'Pyeroy', the leading marine maintenance and painting company in Europe. Not only do we work on buildings but we are specialised in undertaking contracts in a range of Industrial projects. Some projects that require expensive access operations via scaffold can be performed by Vertical World in a fraction of the time at a fraction of the cost.

We take care of all the rigging, carry all our own equipment and our work is very competitively priced. We are CIS and CSR registered allowing us to work on construction sites. We are fully insured.

We produce fully documented method statements and risk assessments for each individual project. If you require any further details or you have any questions please feel free to contact John Kelly, Managing Director, by phone or email. We will try to solve your access problems and offer no obligation quotes.
